

Chemical Safety in Secondary Schools

This one day workshop is for Secondary Science, TAS/IA and VA/CA teachers and is presented by Dr Phillip Crisp.

Phillip has had over 40 years' experience working in University chemical laboratories, including acting as the OHS coordinator for the Faculty of Engineering at the University of NSW for a number of years. He wrote the majority of the appendices for the Chemical Safety in Schools package for the NSW DSE including Appendix D.

Phillip has trained more than 3000 teachers at schools and universities during the last 15 years and his popular courses have provided many teachers with sound practical advice on laboratory safety.

**7th March 2017 @ Our Lady of the Rosary Cultural Centre Auditorium,
McCarthy Catholic College, Tribe Street, Tamworth - 8.30am - 4pm**
